

Grease Master Junior Grease Trap

- **LOW VOLUME SITES:**

The **Grease Master Junior** grease trap is designed for low volume sites (less than 50 meals per day) who want the protection of a grease trap without the cost of a maintenance contract.

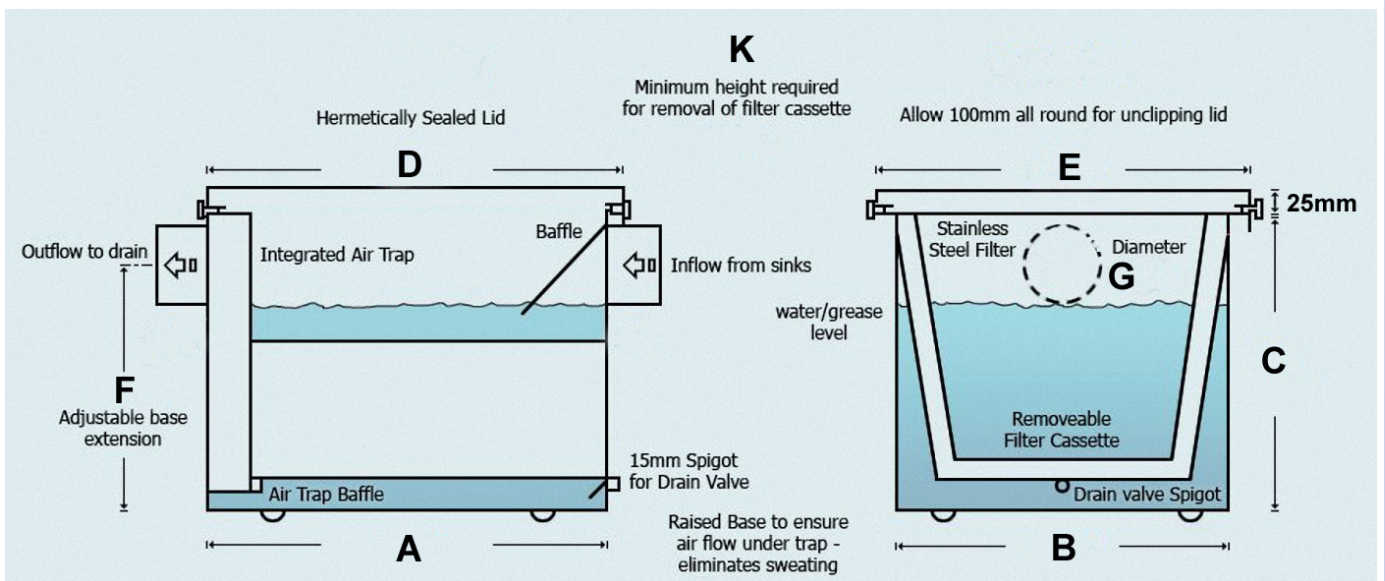

- **BUILT-IN STRAINER:**

The **Grease Master Junior** functions like a normal grease trap but features an in-built filter basket for straining and collecting solid waste.

- **SIMPLE TO MAINTAIN:**

Simply remove the lid and empty the filter basket on a daily basis. Collected liquid oils that cannot be removed by the filter basket should be scooped out on a daily basis with a suitable container and safely disposed of. Each unit is supplied with adjustable legs that allow the unit to be cleaned under and they also make installation easier.

The GMJ's also act as a handy **SOLIDS INTERCEPTOR**

Model	Suitability	A	B	C	D	E	F	G	K	Weight
GMJ SS	Solids Interceptor	225	150	150	225	150	120	40	300	6kg
